FAQ

[Excel Template For Panduit Labels S100x150yaj](#)

3. Write the statement or reason in the two-column proof.

Given:  $\angle VAE \cong \angle VEA$ ,  $AF > EF$

Prove:  $m\angle AVF > m\angle EVF$

	Statements	Reasons
1	$\angle VAE \cong \angle VEA$	
2	$\triangle AVE$ is an isosceles triangle.	
3		Legs of isosceles triangles are congruent.
4	$\overline{FV} \cong \overline{FV}$	
5		Given
6	$m\angle AVF > m\angle EVF$	

In this section, the discussion focuses mainly on using the triangle inequality theorems in solving both real-life problems and problems that require writing proofs.

Considering the application and proof-writing problems found in this module, share your insights on the following questions:

- Can you solve these problems without accurate illustrations and markings on the triangles?
- Can you solve these problems without prior knowledge related to triangles and writing proofs?
- Has your knowledge of algebra helped you in solving the problems?
- Have the theorems on triangle inequalities helped you in writing proofs of theorems?

Having tackled all concepts and skills to be learned on inequalities in triangles, revisit your decisions in Activity No.1 and write your responses to the statements under **My Decisions Later**. Are there changes to your responses? Explain.

What would be your reply to the essential question, "**How can you justify inequalities in triangles?**"

Now that you have a deeper understanding of the topic, it is time for you to put your knowledge and skills to practice before you do the tasks in the next section.
