Copy the Mod name folder to the MODS folder After installing some mods, open the program, the mods will appear in the Left side (the deactivated ones) and you should send them to the Right side (the activated ones) by clicking a mod and then pressing the > button.. It's really easy to use, and lightweight Also, it lets you save profiles with the mods.. Mods have to be 'MODMAN compatible' and blah blah blah My 'weapon of choice' for DCS Modding is JSGME (JoneSoft Generic Mod Enabler) I've been using it for ages now, I'm pretty sure I started using it in the Falcon 4.
