FCT utilizes a metallic sleeve positioned over the tip of the shaft The sleeve can be rotated into different positions, changing the characteristics of the head, by loosening the bolt that secures the sleeve and shaft into the clubhead.. ICT optimizes the way the clubface behaves at impact to create an expanded COR zone.. The TaylorMade R9 driver is the most advanced driver in the company's history building on the technology and innovation that made the R7 driver so popular with golfers.. Ultra Thin Wall Technology Ultra-Thin Wall Technology is a casting process that allows thinner clubhead walls than found in most competitive drivers. [Burn Free For Mac](#)
